#### **DETAILED ACTION**

1. The Board of Patent Appeals and Interferences' decision was received on 5/23/2011. The examiner was reversed.
2. The applicant's supplemental amendment was received on 6/7/2011.

#### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a supplemental amendment filed on 6/7/2011 by James Reed.

The application has been amended as follows:

#### **In the claims:**

Claim 2 (**rejoined**): The stent and support of claim 1, wherein the third member is cylindrical in shape.

Claim 3 (**rejoined**): The stent and support of claim 2, wherein the outer diameter of the third member is about 1.35 mm to about 1.4 mm less than the inner diameter of the stent as positioned on the support.

Claim 9 (**amended**): A stent and a mandrel supporting the stent, the stent comprising a plurality of struts having abluminal surfaces and luminal surfaces in fluid communication through at least a pair of the plurality of struts, the mandrel comprising: a member to penetrate at least partially into a longitudinal bore of the stent during the application of a coating substance to the stent, the member including outward projecting walls, the length of at least one of the walls being not less than 25% of the length of the stent; wherein a cross section of at least one of the walls is triangular in shape.

Claim 10 (**canceled**).

Claim 11 (**canceled**).

Claim 12 (**canceled**).

Claim 15 (**canceled**).

Claim 16 (**canceled**).

Claim 17 (**canceled**).

Claim 18 (**canceled**).

Claim 24 (**canceled**).

Claim 25 (**canceled**).

Claim 26 (**canceled**).

***Claim Rejections***

4. The claim rejections under 35 U.S.C. 103(a) as obvious over Hattler, Berg, and Tower on claims 1 and 4-8 have been reversed by the Board of Patent Appeals and Interferences. The claim rejections under 35 U.S.C. 103(a) as obvious over Hattler, Rosenbluth, and Admitted Prior Art on claims 9, 11, 13, 14, and 19-25 have been reversed by the Board of Patent Appeals and Interferences.

**REASONS FOR ALLOWANCE**

5. Claims 1-9, 13, 14, and 19-23 are allowed. The inventions of claims 1, 9, 19, 20, and 23 recite apparatuses for supporting a stent. The cited prior arts of record, Hattler, Tower, and Rosenbluth, whether alone or in combination, fail to teach or fairly suggest, in the context of independent claims 1, 9, 19, 20, and 23, a support comprising a first member to contact a first end of the stent, a second member to contact a second end of the stent, and a third member connecting the first member to the second member and extending through a longitudinal bore of the stent, the third member shaped and/or sized to eliminate or substantially prevent a coating from being formed on a luminal surface of the stent during application of a coating substance to the stent; a mandrel comprising a member to penetrate at least partially into a longitudinal bore of the stent during the application of a coating substance to the stent, the member including outward projecting walls, the length of at least one of the walls being not less than 25% of the length of the stent, wherein a cross section of at least one of the walls is triangular in shape; a mandrel comprising a member penetrating at least partially into a longitudinal

bore of the stent during the application of a coating substance to the stent, the member including 6 non-parallel sides; a mandrel comprising a core section having at least three sides and a wall extending from each of the sides in an outwardly direction; or a mandrel comprising a member penetrating at least partially into a longitudinal bore of the stent during the application of a coating substance to the stent, the member including outwardly projecting walls disposed around the circumference of the mandrel, wherein each of the walls converge with its neighboring wall at an angle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: **Sirhan et al (USP 7,083,642)** teaches a mandrel for a stent comprising a member including outward projecting walls (col. 15, lines 8-28; see for example Fig. 7B). However, Sirhan does not teach the design recited in the claims of applicants' claimed inventions.
